Accessibility Conformance Report

Revised Section 508 Edition

(Based on VPAT® Version 2.4)

Accurate as of August 11, 2022

Contents

Axonius Accessibility Conformance Report

Name of Product/Version: Axonius Cybersecurity Asset Management

Report Date: August 11, 2022

Product Description: Axonius is a Cybersecurity Asset Attack Surface Management Platform that can resolve organizations' asset visibility and vulnerability challenges. Axonius provides an all-inclusive, consolidated picture, enabling organizations to see every asset by integrating data from the agency's existing systems. It allows users to query against the consolidated data easily and thus monitor asset details in real-time, identify security gaps, and remediate issues. This document includes an overview of the product, key functionality, system architecture, and deployment capabilities and options.

Contact information: Federal@axonius.com

Evaluation Methods Used: The Axonius Cybersecurity Asset Management Platform testing involved a combination of manual and functional testing on desktop. The product was tested internally on a selectin of the application representative of Axonius, among other methodology, the screen reader JAWS 2022, Accessible Name & Description Inspector (ANDI), the Web Accessibility Evaluation Tool WAVE, exclusive use of the keyboard, and manual inspection of code.

Applicable Standards/Guidelines

This report covers the degree of conformance for the following accessibility standard/guidelines:

Standard/Guideline	Included In Report
Web Content Accessibility Guidelines 2.0	Level A (Yes) Level AA (Yes) Level AAA (No)
Revised Section 508 standards published January 18, 2017 and corrected January 22, 2018	(Yes)

Terms

The terms used in the Conformance Level information are defined as follows:

- **Supports**: The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.
- **Partially Supports**: Some functionality of the product does not meet the criterion.
- **Does Not Support**: The majority of product functionality does not meet the criterion.
- **Not Applicable**: The criterion is not relevant to the product.
- **Not Evaluated**: The product has not been evaluated against the criterion. This can be used only in WCAG 2.0 Level AAA.

WCAG 2.0 Report

Tables 1 and 2 also document conformance with Revised Section 508:

- Chapter 5 – 501.1 Scope, 504.2 Content Creation or Editing
- Chapter 6 – 602.3 Electronic Support Documentation

Note: When reporting on conformance with the WCAG 2.0 Success Criteria, they are scoped for full pages, complete processes, and accessibility-supported ways of using technology as documented in the WCAG 2.0 Conformance Requirements.

Legal Disclaimer

Please note that the platform itself includes various settings which may impact certain aspects of accessibility, and certain optional adjustments thereto made by users of the platform may not necessarily adhere to accessibility best practices. This report is provided solely for informational purposes as of the date printed on the first page hereof, and the contents contained herein are subject to change without notice. This report and the contents contained herein do not constitute legal advice, representation, warranty or guarantee of any kind regarding a person's ability to comply with applicable accessibility requirements. Such a determination regarding accessibility is ultimately the sole responsibility of the customer and its users.

Table 1: Success Criteria, Level A

Notes:

Criteria	Conformance Level	Remarks and Explanations
1.1.1 Non-text Content (Level A) All non-text content that is presented to the user has a text alternative that serves the equivalent purpose, except for the situations listed below. • Controls, Input: If non-text content is a control or accepts user input, then it has a name that describes its purpose. (Refer to Guideline 4.1 for additional requirements for controls and content that accepts user input.) • Time-Based Media: If non-text content is time-based media, then text alternatives at least provide descriptive identification of the non-text content. (Refer to Guideline 1.2 for additional requirements for media.) • Test: If non-text content is a test or exercise that would be invalid if presented in text, then text alternatives at least provide descriptive identification of the non-text content. • Sensory: If non-text content is primarily intended to create a specific sensory experience, then text alternatives at least provide descriptive identification of the non-text content. • CAPTCHA: If the purpose of non-text content is to confirm that content is being accessed by a person rather than a computer, then text alternatives that identify and describe the purpose of the non-text content are provided, and alternative forms of CAPTCHA using output modes for different types of sensory perception are provided to accommodate different disabilities. • Decoration, Formatting, Invisible: If non-text content is pure decoration, is used only for visual formatting, or is not presented	**Web:** Partially Supports **Electronic Docs:** Does Not Support	**Web:** Most non-text content that is presented to the user has a text alternative that serves the equivalent purpose. Partially supports for the following reasons: • Not all non-text content has appropriate text alternatives or do not convey this information to assistive technology (AT) programmatically **Electronic Docs:** All non-text content that is presented to the user does not have a text alternative that serves the equivalent purpose.

Criteria	Conformance Level	Remarks and Explanations
to users, then it is implemented in a way that it can be ignored by assistive technology.		
1.2.1 Audio-only and Video-only (Prerecorded) (Level A) For prerecorded audio-only and prerecorded video-only media, the following are true, except when the audio or video is a media alternative for text and is clearly labeled as such: • Prerecorded Audio-only: An alternative for time-based media is provided that presents equivalent information for prerecorded audio-only content. • Prerecorded Video-only: Either an alternative for time-based media or an audio track is provided that presents equivalent information for prerecorded video-only content.	**Web:** Supports **Electronic Docs:** Does Not Support	**Web:** No prerecorded audio or video **Electronic Docs:** Prerecorded videos do not have alternate labels
1.2.2 Captions (Prerecorded) (Level A) Captions are provided for all prerecorded audio content in synchronized media, except when the media is a media alternative for text and is clearly labeled as such.	**Web:** Supports **Electronic Docs:** Supports	**Web:** No prerecorded audio or video **Electronic Docs:** Prerecorded videos have Closed Captions
1.2.3 Audio Description or Media Alternative (Prerecorded) (Level A) An alternative for time-based media or audio description of the prerecorded video content is provided for synchronized media, except when the media is a media alternative for text and is clearly labeled as such.	**Web:** Supports **Electronic Docs:** Does Not Support	**Web:** No prerecorded audio or video **Electronic Docs:** Prerecorded videos do not have alternative media. These videos describe the content on the page, so the alternative to watching the video is reading the page, which can also be exported to a pdf.
1.3.1 Info and Relationships (Level A) Information, structure, and relationships conveyed through presentation can be programmatically determined or are available in	**Web:** Supports	**Web:** Information, structure, and relationships conveyed through presentation can be programmatically

Criteria	Conformance Level	Remarks and Explanations
text.	**Electronic Docs:** Supports	determined or are available in text. **Electronic Docs:** Information, structure, and relationships conveyed through presentation can be programmatically determined or are available in text.
1.3.2 Meaningful Sequence (Level A) When the sequence in which content is presented affects its meaning, a correct reading sequence can be programmatically determined.	**Web:** Supports **Electronic Docs:** Supports	**Web:** When the sequence in which content is presented affects its meaning, a correct reading sequence can be programmatically determined. **Electronic Docs:** When the sequence in which content is presented affects its meaning, a correct reading sequence can be programmatically determined.
1.3.3 Sensory Characteristics (Level A) Instructions provided for understanding and operating content do not rely solely on sensory characteristics of components such as shape, size, visual location, orientation, or sound.	**Web:** Supports **Electronic Docs:** Supports	**Web:** Instructions provided for understanding and operating content do not rely solely on sensory characteristics of components, such as size, visual location, orientation, or sound. **Electronic Docs:** Instructions provided for understanding and operating content do not rely solely on sensory characteristics of components, such as size, visual location, orientation, or sound.
1.4.1 Use of Color (Level A) Color is not used as the only visual means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	**Web:** Supports **Electronic Docs:**	**Web:** Axonius uses color to draw attention to buttons, links, and other features but is accompanied by text or additional means of identifying these objects.

Criteria	Conformance Level	Remarks and Explanations
	Supports	**Electronic Docs:** Color is not used as the only visual means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.
1.4.2 Audio Control (Level A) If any audio on a Web page plays automatically for more than 3 seconds, either a mechanism is available to pause or stop the audio, or a mechanism is available to control audio volume independently from the overall system volume level.	**Web:** Supports **Electronic Docs:** Supports	**Web:** There are no audio components within the application **Electronic Docs:** There are no audio components which start automatically within the documentation. All audio components are started by the user.
2.1.1 Keyboard (Level A) All functionality of the content is operable through a keyboard interface without requiring specific timings for individual keystrokes, except where the underlying function requires input that depends on the path of the user's movement and not just the endpoints.	**Web:** Partially Supports **Electronic Docs:** Partially Supports	**Web:** The content within the product is generally operable through a keyboard interface without requiring specific timings for individual keystrokes. However, a rating of Partially Supports has been given for the following reason(s): • Some controls are not part of the focus order. • At times, a dialog may not receive focus when opened or focus may not be set explicitly when closed. • Within the query wizard, some values within drop downs cannot be accessed with a keyboard. • At times navigation is confusing requiring the use of arrow keys instead of Tab. • Some areas are only accessible by keyboard with the assistance of AT

Criteria	Conformance Level	Remarks and Explanations
		Electronic Docs: The content within the product is generally operable through a keyboard interface without requiring specific timings for individual keystrokes. However, a rating of Partially Supports has been given for the following reason(s): • Some areas are only accessible by keyboard with the assistance of AT
2.1.2 No Keyboard Trap (Level A) If keyboard focus can be moved to a component of the page using a keyboard interface, then focus can be moved away from that component using only a keyboard interface, and, if it requires more than unmodified arrow or tab keys or other standard exit methods, the user is advised of the method for moving focus away.	**Web:** Supports **Electronic Docs:** Supports	**Web:** No keyboard traps exist **Electronic Docs:** No keyboard traps exist
2.2.1 Timing Adjustable (Level A) For each time limit that is set by the content, at least one of the following is true: • Turn off: The user is allowed to turn off the time limit before encountering it; or • Adjust: The user is allowed to adjust the time limit before encountering it over a wide range that is at least ten times the length of the default setting; or • Extend: The user is warned before time expires and given at least 20 seconds to extend the time limit with a simple action (for example, "press the space bar"), and the user is allowed to extend the time limit at least ten times; or • Real-time Exception: The time limit is a required part of a real-time event (for example, an auction), and no alternative to the	**Web:** Supports **Electronic Docs:** Supports	**Web:** The product does not have content that requires timed interactions. Authentication is revoked when the window is closed or after a period of inactivity for security reasons, which is configurable by the organization. **Electronic Docs:** The product does not have content that requires timed interactions.

Criteria	Conformance Level	Remarks and Explanations
time limit is possible; or • Essential Exception: The time limit is essential and extending it would invalidate the activity; or • 20 Hour Exception: The time limit is longer than 20 hours.		
2.2.2 Pause, Stop, Hide (Level A) For moving, blinking, scrolling, or auto-updating information, all of the following are true: • Moving, blinking, scrolling: For any moving, blinking or scrolling information that (1) starts automatically, (2) lasts more than five seconds, and (3) is presented in parallel with other content, there is a mechanism for the user to pause, stop, or hide it unless the movement, blinking, or scrolling is part of an activity where it is essential; and • Auto-updating: For any auto-updating information that (1) starts automatically and (2) is presented in parallel with other content, there is a mechanism for the user to pause, stop, or hide it or to control the frequency of the update unless the auto-updating is part of an activity where it is essential.	**Web:** Supports **Electronic Docs:** Supports	**Web:** The product does not contain moving, blinking, or scrolling content, or synchronized media. **Electronic Docs:** No moving, blinking, scrolling, or auto-updating information.
2.3.1 Three Flashes or Below Threshold (Level A) Web pages do not contain anything that flashes more than three times in any one second period, or the flash is below the general flash and red flash thresholds.	**Web:** Supports **Electronic Docs:** Supports	**Web:** The product does not contain flashing content **Electronic Docs:** The user interface does not contain anything that flashes more than three times in any one second period.
2.4.1 Bypass Blocks (Level A) A mechanism is available to bypass blocks of content that are repeated on multiple Web pages.	**Web:** Does Not Support **Electronic Docs:**	**Web:** There is no way to skip major sections within the user interface.

Criteria	Conformance Level	Remarks and Explanations
	Supports	**Electronic Docs:** This product provides skip links as mechanisms to bypass blocks of content.
2.4.2 Page Titled (Level A) Web pages have titles that describe topic or purpose.	**Web:** Does Not Support **Electronic Docs:** Supports	**Web:** Each page does not have a unique title. **Electronic Docs:** Each page has a unique title.
2.4.3 Focus Order (Level A) If a Web page can be navigated sequentially and the navigation sequences affect meaning or operation, focusable components receive focus in an order that preserves meaning and operability.	**Web:** Partially Supports **Electronic Docs:** Supports	**Web:** Most components receive focus in an order that preserves meaning and operability. However, a rating of Partially Supports has been given for the following reasons(s): • In rare instances, the programmatic order does not match the visual reading order for a control; or focus may not be shifted as expected when activating or hiding a modal. **Electronic Docs:** Components receive focus in an order that preserves meaning and operability.
2.4.4 Link Purpose (In Context) (Level A) The purpose of each link can be determined from the link text alone or from the link text together with its programmatically determined link context, except where the purpose of the link would be ambiguous to users in general.	**Web:** Partially Supports **Electronic Docs:** Supports	**Web:** In general, links are understandable in context. However, a rating of Partially Supports has been given for the following reason(s): • In some instances, links show up in a list of links generated by AT and their text may not make

Criteria	Conformance Level	Remarks and Explanations
		sense in context. **Electronic Docs:** The purpose of each link can be determined from the link text alone or from the link text together with its programmatically determined link context. This is not a requirement where the purpose of the link would be ambiguous to users in general.
3.1.1 Language of Page (Level A) The default human language of each Web page can be programmatically determined.	**Web:** Supports **Electronic Docs:** Supports	**Web:** The default human language can be programmatically determined. **Electronic Docs:** The default human language can be programmatically determined.
3.2.1 On Focus (Level A) When any component receives focus, it does not initiate a change of context.	**Web:** Supports **Electronic Docs:** Supports	**Web:** When any user interface components within the product receive focus, it does not initiate a change in context. **Electronic Docs:** When any user interface components within the product receive focus, it does not initiate a change in context.
3.2.2 On Input (Level A) Changing the setting of any user interface component does not automatically cause a change of context unless the user has been advised of the behavior before using the component.	**Web:** Supports **Electronic Docs:** Supports	**Web:** Changing the setting of user interface components within the product does not automatically cause a change of context unless the user has been advised of the behavior before using the component.

Criteria	Conformance Level	Remarks and Explanations
		Electronic Docs: Changing the setting of user interface components within the product does not automatically cause a change of context unless the user has been advised of the behavior before using the component.
3.3.1 Error Identification (Level A) If an input error is automatically detected, the item that is in error is identified and the error is described to the user in text.	**Web:** Partially Supports **Electronic Docs:** Partially Supports	**Web:** Generally, the product notifies all users which elements are in error and why. However, a rating of Partially Supports has been given for the following reason(s): • In some instances, errors are not programmatically discernable. **Electronic Docs:** Generally, the product notifies all users which elements are in error and why. However, a rating of Partially Supports has been given for the following reason(s): • In some instances, errors are not programmatically discernable.
3.3.2 Labels or Instructions (Level A) Labels or instructions are provided when content requires user input.	**Web:** Partially Supports **Electronic Docs:** Partially Supports	**Web:** In most cases fields have instructions for user input, however, a rating of Partially Supports has been given for the following reason(s): • In some instances, the same accessible name is shared by multiple inputs • Some buttons do not have labels. • Within the query wizard, buttons and drop downs are not labeled.

Criteria	Conformance Level	Remarks and Explanations
		Electronic Docs: In most cases fields have instructions for user input, however, a rating of Partially Supports has been given for the following reason(s): • In some instances, the same accessible name is shared by multiple inputs • Some buttons do not have labels.
4.1.1 Parsing (Level A) In content implemented using markup languages, elements have complete start and end tags, elements are nested according to their specifications, elements do not contain duplicate attributes, and any IDs are unique, except where the specifications allow these features.	**Web:** Supports **Electronic Docs:** Supports	**Web:** The application uses HTML and ARIA and are compliant with the relevant specifications. **Electronic Docs:** The application uses HTML and ARIA and are compliant with the relevant specifications.
4.1.2 Name, Role, Value (Level A) For all user interface components (including but not limited to: form elements, links and components generated by scripts), the name and role can be programmatically determined; states, properties, and values that can be set by the user can be programmatically set; and notification of changes to these items is available to user agents, including assistive technologies.	**Web:** Partially Supports **Electronic Docs:** Partially Supports	**Web:** For most user interface components with the product, the name, role, and state can be programmatically determined. However, a rating of Partially Supports has been given for the following reason(s): • Some elements do not have name, role, and state information. • Some elements have inappropriate or missing ARIA attributes. • Multiple inputs share the same name. **Electronic Docs:** For most user interface components with the product, the name, role, and state can be programmatically

Criteria	Conformance Level	Remarks and Explanations
		determined. However, a rating of Partially Supports has been given for the following reason(s): • Some elements do not have name, role, and state information. • Some elements have inappropriate or missing ARIA attributes.

Table 2: Success Criteria, Level AA

Notes:

Criteria	Conformance Level	Remarks and Explanations
1.2.4 Captions (Live) (Level AA) Captions are provided for all live audio content in synchronized media.	**Web:** Supports **Electronic Docs:** Supports	**Web:** The product does not contain live video or audio content. **Electronic Docs:** The product does not contain live video or audio content.
1.2.5 Audio Description (Prerecorded) (Level AA) Audio description is provided for all prerecorded video content in synchronized media.	**Web:** Supports **Electronic Docs:** Does Not Support	**Web:** The product does not contain prerecorded audio-only or video-only content. **Electronic Docs:** Prerecorded videos do not have alternative media. These videos describe the content on the page, so the alternative to watching the video is reading the page, which can also be exported to a pdf.

Criteria	Conformance Level	Remarks and Explanations
1.4.3 Contrast (Minimum) (Level AA) The visual presentation of text and images of text has a contrast ratio of at least 4.5:1, except for the following: • Large Text: Large-scale text and images of large-scale text have a contrast ratio of at least 3:1; • Incidental: Text or images of text that are part of an inactive user interface component, that are pure decoration, that are not visible to anyone, or that are part of a picture that contains significant other visual content, have no contrast requirement. • Logotypes: Text that is part of a logo or brand name has no minimum contrast requirement.	**Web:** Partially Supports **Electronic Docs:** Partially Supports	**Web:** The visual presentation of text and images of text generally has a contrast ratio of at least 4:5:1 and 3:1 for large text. However, a rating of Partially Supports has been given for the following reason(s): • Some text elements have insufficient color contrasts when compared with its background. **Electronic Docs:** The visual presentation of text and images of text generally has a contrast ratio of at least 4:5:1 and 3:1 for large text. However, a rating of Partially Supports has been given for the following reason(s): • Some text elements have insufficient color contrasts when compared with its background.
1.4.4 Resize text (Level AA) Except for captions and images of text, text can be resized without assistive technology up to 200 percent without loss of content or functionality.	**Web:** Supports **Electronic Docs:** Supports	**Web:** Text can be resized using the browser tools without loss of content or functionality. **Electronic Docs:** Text can be resized using the browser tools without loss of content or functionality.
1.4.5 Images of Text (Level AA) If the technologies being used can achieve the visual presentation, text is used to convey information rather than images of text except for the following: • Customizable: The image of text can be visually customized to the	**Web:** Supports **Electronic Docs:** Supports	**Web:** Text is used to convey information rather than images of text, except where a particular presentation of text is essential to the information being conveyed, such as logotypes. **Electronic Docs:**

Criteria	Conformance Level	Remarks and Explanations
user's requirements; • Essential: A particular presentation of text is essential to the information being conveyed.		Text is used to convey information rather than images of text, except where a particular presentation of text is essential to the information being conveyed, such as logotypes.
2.4.5 Multiple Ways (Level AA) More than one way is available to locate a Web page within a set of Web pages except where the Web Page is the result of, or a step in, a process.	**Web:** Does Not Support **Electronic Docs:** Supports	**Web:** The majority of web pages are only accessible one way. **Electronic Docs:** More than one way is available to locate a web page within a set of web pages, except where the web page is the result, or a step in, a process.
2.4.6 Headings and Labels (Level AA) Headings and labels describe topic or purpose.	**Web:** Partially Supports **Electronic Docs:** Partially Supports	**Web:** Most content headings and labels that exist within the product are descriptive and unique. However, a rating of Partially Supports has been given for the following reason(s): • Occasionally, elements have incomplete labels **Electronic Docs:** Most content headings and labels that exist within the product are descriptive and unique. However, a rating of Partially Supports has been given for the following reason(s): • Occasionally, elements have incomplete labels • The same title text is used multiple times on the same page.
2.4.7 Focus Visible (Level AA) Any keyboard operable user interface has a mode of operation where	**Web:**	**Web:** The keyboard focus indicator is not evident without the

Criteria	Conformance Level	Remarks and Explanations
the keyboard focus indicator is visible.	Does Not Support **Electronic Docs:** Partially Supports	use of AT. **Electronic Docs:** For most of the components, the keyboard focus is indicated visually. However, a rating of Partially Supports has been given for the following reasons: • Some interactive elements do not have a visible focus indicator, or the indicator does not meet contrast requirements without the use of AT.
3.1.2 Language of Parts (Level AA) The human language of each passage or phrase in the content can be programmatically determined except for proper names, technical terms, words of indeterminate language, and words or phrases that have become part of the vernacular of the immediately surrounding text.	**Web:** Supports **Electronic Docs:** Supports	**Web:** The human language of each passage or phrase in the content can be programmatically determined. **Electronic Docs:** The human language of each passage or phrase in the content can be programmatically determined.
3.2.3 Consistent Navigation (Level AA) Navigational mechanisms that are repeated on multiple Web pages within a set of Web pages occur in the same relative order each time they are repeated, unless a change is initiated by the user.	**Web:** Supports **Electronic Docs:** Supports	**Web:** The same header and footer navigation appears on all pages. General layout of the pages is also consistent, with the main content on the right and other items to the left. **Electronic Docs:** The same header and footer navigation appears on all pages. General layout of the pages is also consistent, with the main content on the right and other items to the left.
3.2.4 Consistent Identification (Level AA) Components that have the same functionality within a set of Web	**Web:**	**Web:** Components that have the same functionality within the

Criteria	Conformance Level	Remarks and Explanations
pages are identified consistently.	Supports **Electronic Docs:** Supports	product are identified consistently. **Electronic Docs:** Components that have the same functionality within the product are identified consistently.
3.3.3 Error Suggestion (Level AA) If an input error is automatically detected and suggestions for correction are known, then the suggestions are provided to the user, unless it would jeopardize the security or purpose of the content.	**Web:** Supports **Electronic Docs:** Supports	**Web:** If an input error is automatically detected and suggestions for correction are known, then the suggestions are provided to the user within the product. **Electronic Docs:** If an input error is automatically detected and suggestions for correction are known, then the suggestions are provided to the user within the product.
3.3.4 Error Prevention (Legal, Financial, Data) (Level AA) For Web pages that cause legal commitments or financial transactions for the user to occur, that modify or delete user-controllable data in data storage systems, or that submit user test responses, at least one of the following is true: • Reversible: Submissions are reversible. • Checked: Data entered by the user is checked for input errors and the user is provided an opportunity to correct them. • Confirmed: A mechanism is available for reviewing, confirming, and correcting information before finalizing the submission.	**Web:** Not Applicable **Electronic Docs:** Not Applicable	**Web:** The product does not cause legal commitments or financial transactions for the to occur, does not modify or delete user-controllable data in data storage systems, and does not submit user test responses. **Electronic Docs:** The product does not cause legal commitments or financial transactions for the to occur, does not modify or delete user-controllable data in data storage systems, and does not submit user test responses.

Table 3: Success Criteria, Level AAA

Notes: Table 3 has been removed because this product has not been tested for conformance to WCAG Level AAA criteria.

Revised Section 508 Report

Notes:

Chapter 3: Functional Performance Criteria (FPC)

Notes:

Criteria	Conformance Level	Remarks and Explanations
302.1 Without Vision Where a visual mode of operation is provided, ICT shall provide at least one mode of operation that does not require user vision.	Partially Supports	A rating of Partially Supports has been given for the following reason(s): • As described in **1.1.1 Non-text Content**, Most non-text content has text alternatives, butsome do not appropriate text alternatives or do not convey this information to assistive technology (AT) programmatically. • As described in **1.3.1 Info and Relationships**, information, structure, and relationships conveyed through presentation can be programmatically determined or are available in text. • As described in **1.3.2 Meaningful Sequence**, when the sequence in which content is presented affects its meaning, a correct reading sequence can be programmatically determined. • As described in **1.4.1 Use of Color**, Axonius uses color to draw attention to buttons, links, and other features but is accompanied by text or additional means of identifying these objects. • As described in **2.1.1 Keyboard**, some interactive elements are not accessible via the keyboard and occasionally focus is not moved as expected for modal dialogs without the use of AT. • As described in **2.4.3 Focus Order**, the focus order of some interactive elements is not logical, and the focus

Criteria	Conformance Level	Remarks and Explanations
		does not move to the updated content. • As described in **2.4.4 Link Purpose**, in general, links have good text, but, in some instances, they show up as a list of links and can be confusing. • As described in **2.4.6 Headings and Labels**, ocassionally elements have incomplete labels. • As described in **3.3.2 Labels and Instructions**, some interactive elements have the same name. • As described in **4.1.2 Name, Role, Value**, some controls do not provide valid name, role, and/or state.
302.2 With Limited Vision Where a visual mode of operation is provided, ICT shall provide at least one mode of operation that enables users to make use of limited vision.	Partially Supports	A rating of Partially Supports has been given for the following reason(s): • As described in **1.4.1 Use of Color**, Axonius uses color to draw attention to buttons, links, and other features but is accompanied by text or additional means of identifying these objects. • As described in **1.4.3 Contrast (Minimum)**, there are some elements that lack the required contrast ratio.
302.3 Without Perception of Color Where a visual mode of operation is provided, ICT shall provide at least one visual mode of operation that does not require user perception of color.	Partially Supports	A rating of Partially Supports has been given for the following reason(s): • As described in **1.4.1 Use of Color**, Axonius uses color to draw attention to buttons, links, and other features but is accompanied by text or additional means of identifying these objects. • As described in **1.4.3 Contrast (Minimum)**, there are some elements that lack the required contrast ratio.
302.4 Without Hearing Where an audible mode of operation is provided, ICT shall provide at least one mode of operation that does not require user hearing.	Supports	The product does not require the use of hearing.
302.5 With Limited Hearing	Supports	The product does not require the use of hearing.

Criteria	Conformance Level	Remarks and Explanations
Where an audible mode of operation is provided, ICT shall provide at least one mode of operation that enables users to make use of limited hearing.		
302.6 Without Speech Where speech is used for input, control, or operation, ICT shall provide at least one mode of operation that does not require user speech.	Supports	The product does not require the use of speech.
302.7 With Limited Manipulation Where a manual mode of operation is provided, ICT shall provide at least one mode of operation that does not require fine motor control or simultaneous manual operations.	Partially Supports	A rating of Partially Supports has been given for the following reason(s): • As described in **2.1.1 Keyboard**, some interactive elements are not accessible via the keyboard and occasionally focus is not moved as expected for modal dialogs without the use of AT. • As described in **2.4.3 Focus Order**, the focus order of some interactive elements is not logical, and the focus does not move to the updated content. • As described in **2.4.7 Focus Visible**, the keyboard focus indicator is not evident without the use of AT.
302.8 With Limited Reach and Strength Where a manual mode of operation is provided, ICT shall provide at least one mode of operation that is operable with limited reach and limited strength.	Partially Supports	A rating of Partially Supports has been given for the following reason(s): • As described in **2.1.1 Keyboard**, some interactive elements are not accessible via the keyboard and occasionally focus is not moved as expected for modal dialogs without the use of AT. • As described in **2.4.3 Focus Order**, the focus order of some interactive elements is not logical, and the focus does not move to the updated content.
302.9 With Limited Language, Cognitive, and Learning Abilities ICT shall provide features making its use by individuals with limited cognitive, language, and learning abilities simpler and	Partially Supports	A rating of Partially Supports has been given for the following reason(s): • As described in **1.4.1 Use of Color**, Axonius uses color to draw attention to buttons, links, and other features but

Criteria	Conformance Level	Remarks and Explanations
easier.		is accompanied by text or additional means of identifying these objects. • As described in **3.3.2 Labels and Instructions**, some interactive elements have the same name.

Chapter 4: Hardware

Notes: Axonius is not impacted by Chapter 4: Hardware. This section has been removed from the report.

Chapter 5: Software

Notes: Axonius is a web-only product, not platform software, and is not impacted by Chapter 5: Software. This section has been removed from the report.

Chapter 6: Support Documentation and Services

Notes:

Criteria	Conformance Level	Remarks and Explanations
601.1 Scope	Heading cell – no response required	Heading cell – no response required
602 Support Documentation	Heading cell – no response required	Heading cell – no response required
602.2 Accessibility and Compatibility Features Documentation shall list and explain how to use the accessibility and compatibility features required by Chapters 4 and 5. Documentation shall include accessibility features that are built-in and accessibility features that provide compatibility with assistive technology.	Not Applicable	This product report is not impacted by Chapters 4 and 5
602.3 Electronic Support Documentation Documentation in electronic format, including Web-based self-service support, shall conform to Level A and Level AA Success Criteria and Conformance Requirements in WCAG 2.0 (incorporated by reference, see 702.10.1).	Partially Supports	See Electronic Docs details in Tables 1 and 2.
602.4 Alternate Formats for Non-Electronic Support Documentation	Not Applicable	Web-based electronic support
